Installing / Removing the Base Stand

⚠ The LED display is very fragile, and must be protected at all times when installing and removing the base stand. Be sure that no hard or sharp object, or anything that could scratch or damage the LED display, comes into contact with it. DO NOT exert pressure on the front of the TV at any time because the screen could crack.

1. Disconnect all cables connected to the TV.

2. Lay the TV down on a flat surface with the back side facing up. Please make sure to place a soft cushioned material (such as a pillow or thick piece of foam) beneath the screen.

3. Put the stand to the neck of the TV set as shown below.

image 1
Attach the stand with the supplied screws.

Installing Batteries in the Remote Control

1. Press and lift the back cover to open the battery compartment of the remote control.

2. Insert two 1.5V AAA size batteries. Make sure to match the (+) and (-) ends of the batteries with the (+) and (-) ends indicated in the battery compartment.

3. Close the battery compartment cover.
Handling the Batteries
- Improper or incorrect use of batteries may cause corrosion or battery leakage, which could cause fire, personal injury or damage to property.
- Only use the battery type indicated in this manual.
- When the batteries are exhausted, the remote will not function. Replace both batteries at the same time with new ones.
- Do not install new batteries with used ones and do not mix different types of batteries.
- Do not dispose of used batteries as domestic waste. Dispose of them in accordance with local regulations.

Handling the Remote Control
- Take care of your fingernails when you press and hold the battery release tab.
- Do not drop or cause impact to the remote control.
- Do not spill water or any liquid on the remote control.
- Do not place the remote control on a wet object.
- Do not place the remote control under direct sunlight or near sources of excessive heat.
- Remove the battery from the remote control when not in use for a long period of time, as it could cause corrosion or battery leakage and may result in physical injury and/or property damage including fire.

Remote Control Operation Range

Point the remote control at the TV no more than 5 metres from the remote control sensor on the TV and within 60° in front of the TV. The operating distance may vary depending on the brightness of the room.
30°   30°

5M

Remote Code:0156

To use your sky remote control with this TV follow the instructions given with the sky remote to programme different codes.

Making Video and Audio Connections

Not all AV devices have the ability to connect to a TV, please refer to the owner's manual of your AV device for compatibility and connection procedures.

When connecting any external AV device, do not connect the mains cable to the mains socket until all other connections are complete.

Best Video Performance		Signal Type	Separate Audio Connection Required
	HDMI	HDMI (480i/480p/576i/576p/720p/1080i/1080p)	No
	VGA	PC	Yes PC AUDIO
	Mini YPbPr	Component Video (480i/480p/576i/576p/720p/1080i/1080p)	Yes Mini AV
	Mini AV	Composite Video	No

# Connecting an AV Device with an HDMI Cable

- This TV can accept High-Definition Multimedia Interface (HDMI) and supports HDCP (High-Bandwidth Digital Content Protection) Protocol.

- The TV has a total of HDMI input sockets, please make sure the correct input source is selected corresponding to your connected HDMI input socket.

- When you connect to the output of an HD ready player (blu-ray disc player, game console, set-top box or computer) switch to the HDMI function and the TV will automatically detect the resolution used by the HDMI source.

- To get the best picture quality, adjust the blu-ray disc player, game console or set-top box output resolution up to 1920 x 1080p.

Rear View of TV

1. Use an HDMI cable to connect the TV's HDMI input socket to the external AV device's HDMI output socket.

2. Plug the connected devices into the mains socket

3. Press the **STANDBY** button on the TV or the ⏻ button on the remote control to turn on your TV.

4. Press the **SOURCE** button on the TV or the **SOURCE** button on the remote control to display the Source List. Use the ▲▼ buttons to select **HDMI** and then press the **OK** button to confirm.

⚠ Although this TV is able to connect to an HDMI device, it is possible that some devices may not operate correctly.

Turning the TV on for the First Time
1. Connect one end of the RF coaxial cable to the aerial socket on the wall and the other end of the cable to the Aerial socket at the rear bottom of your TV.

   ⚠️ Do not connect the TV to the mains supply until you have completed all the connections.
2. Connect the mains cable to the mains socket after you have completed all the connections.

3. At this stage, the TV switches to standby mode. The red LED indicator will illuminate on the front panel of the TV.

4. In standby mode, press the **STANDBY** button on the TV or the ⏻ button on the remote control to turn the TV on. The LED indicator will change from red to green.
   ✦ The **STANDBY** button is located on the rear right side of the TV.

   ⚠️ • Always disconnect the TV from the mains socket when not in use for a long period of time.
   • The **STANDBY** button on the rear right side of the TV or the ⏻ button on the remote control is only used for switching the TV into standby, it does not disconnect the TV from the mains power. To completely disconnect the mains power, please remove the mains cable from the mains socket.

5. If this is the first time you are turning on the TV and there are no programs in the TV memory, the **Quick Start** menu will appear on the screen. There are 4 setups as follow:

Default Prog

Press left/right buttons to select Last or 7488.

Max Volume

Press up/down buttons to select the "Max Volume" option and then press right button to set the desired volume. Then the output volume will never exceed the set maximumvalue.

Default Volume

Press up/down buttons to select the "Default Volume" option and then press right button to set the default volume.

Clear Lock

Press up/down buttons to select the "Clear Lock" option and then press right button to anable it.Allhotel settings will remain disabled until you enable the Hotel Lock again.

Time Setting

1. Press the **Menu** button and then press the ▲▼ buttons to select the
   Time menu.

2. Press the **OK** or ▾ buttons and then press the ▲▼ buttons to select
   the following feature options and then press the **OK** button.
Clock

Press the OK button to set date and time.

Off Time

Press the OK button to set off time.

On Time

Press the OK button to set on time.

Sleep Timer

The sleep timer automatically switches the TV to standby after the preset time has elapsed.The clock
will be set automatically when receiving a digital signal.Time must be set before using Sleep Timer function.

Press up/down buttons to select a period of time after which the TV automatically switches to standby mode:
OFF/10/20/.../180/240 min and then press the OK button to confirm.The timer begains to count down from
the number of minutes selected.

Auto Standby

The unit will automatically switch to standby mode 4 hours after the last time the remote control was used.
A reminder screen will pop up and count down before the unit switches to standby mode.If you want to operate
the TV for a long period of time,tun off the auto standby function by selecting Never.

Time Zone

When you select a Time Zone city,the TV time is set by the time offset information based on Time Zone and
GMT which is received with the broadcast signal and the time is set automatically by a digital signal.
Press the up/down/left/right buttons to select the desired time zone city and then press the OK button to
confirm.(DTV mode)

OSD Timer

Press up/down buttons to select the display time of the on-screen menu:5s/10s/15s/20s/25s/30s/Nevel and
then press the OK button to confirm.

Option Setting

1. Press the **Menu** button and then press the ▲▼ buttons to select the Option menu.

2. Press the **OK** or ▼ buttons and then press the ▲▼ buttons to select the following feature options and then press the **OK** button.
OSD Language

Allows you to select the on screen display menu language.

Audio Languages

Select the audio languages.The availability of this function depends on the tuned-in channel.(can only be selected in DTV mode)

Subtitle Language

Select the subtitle language.The availability of this function depends on the tuned-in channel.(can only be selected in DTV mode)

Hearing Impaired

Allows you to show more information in subtitles for the hearing-impaired in some programmes(can only be selected in DTV mode)

PVR File System

Allows you to test the speed of the USB device or Format the USB device

Reset

Restores all settings to the factory defaults.

First Time Installation

This option allows you to reset the TV to the default factory setting.Once activated the TV will go to standby mode.
Home Mode

Allow you to select among:Max Performance mode Home mode and Max Economy mode.

Blue Screen

Press left/right buttons to select ON or OFF

Connecting a USB Storage Device

1. Switch off the TV before connecting any USB storage device.

2. Connect your USB storage device to the USB port of your TV.

3. Plug the connected devices into the mains socket

4. Press the **STANDBY** button on of the TV or the ⏻ button on the remote control to turn on your TV.

5. Press the **SOURCE** button on the TV or the **SOURCE** button on the remote control to display the Source List. Use the ▲▼ buttons to select **Media** and then press the **OK** button to confirm.

USB Cable (not included)

USB Hub

Portable hard Disk

Adapter

⚠ • If a hard disk is used, make sure its mains adapter is connected to the mains supply.
  • If a USB hub is used, make sure its mains adapter is connected to the mains supply as the total current consumption may exceed 500mA.
  • The maximum supported storage space of the hard disk is 1 TB.
  • The file system only supports HiSpeed FS, FAT16, FAT32, NTFS formats (NTFS Compressed files are not supported).
  • If you want to store the video streaming of a DTV programme, the transfer rate of the USB storage device must not be less than 5MB/s, otherwise the picture and sound of the programme will be affected and a warning statement will be shown on the screen. If this happens, please upgrade your USB storage device.
  • The TV screen will be blank temporarily as it will take time to start up and stabilise the connected hard disk. This is normal and the starting time may vary depending on the brand and the memory size of the connected hard disk.
  • Disconnect the USB storage device if it is not in use.

  • USB output: DC 5V ⎓ 500mA

Multimedia Operation

Basic Operation

1.Press the SOURCE button on tje remote control to display the input source menu,select the USB source with the up/down buttons and press the OK button to enter the Multimedia menu below.

DVD Operation

Press the STANDBY button on the TV or the remote control, and select "DVD" source by the SOURCE.

If there is no disc in the DVD player the screen will show "No Disc".

Insert Disc according to picture next to disc slot.

Do not touch the playing surface.

Hold the disc around the outside with your fingers and place the disc into the slot The player will automatically draw the disc into the player.

To eject the disc, press the "EJECT " button.

DVD Setup Menu

· Setup Mode provides the menu for the configuration of General Setup Page, Audio Setup Page, Dolby Digital, Setup, Preference Page.
· Item selection in the Setup Menu is done by using the Navigation Arrows and the OK button.

Enter the DVD Setup menu

Press MENU button on the remote control and select OPTIONS menu as below, then select DVD Setup, press the OK button to enter the DVD main menu as below.
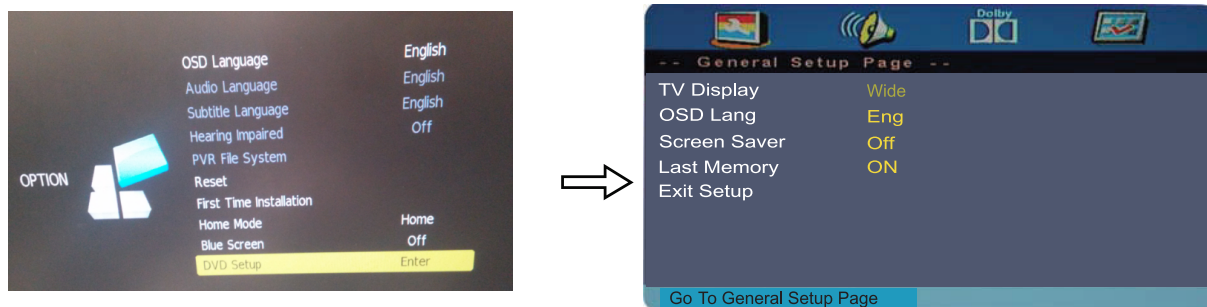

Exit the DVD Setup menu

Select the " Exit Setup " item in the General Setup menu of DVD setup menu, and press OK button twice to exit the DVD Setup menu.

General Setup
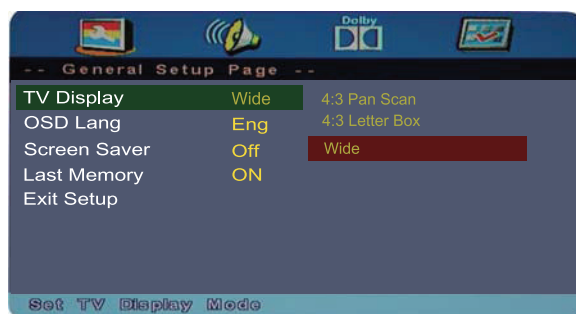

TV Display

· 4:3 Pan Scan

This is selected when the DVD player is connected to a normal TV. Wide-screen images are shown on the screen, but with some parts cut automatically.

· 4:3 Letter Box

This is selected when the player is connected to a normal TV. Wide-screen images are shown on the screen, with black belt on the top and bottom.

· Wide

This is selected when the player is connected to a wide-screen TV.

28

OSD Language
This is used to select the OSD language.
Screen Saver
Start the screen saver, the screen saver image will appear when the player stops or the picture is paused for a few minutes. This saver can keep the screen from being damaged.

- ON (start the screen saver)
- Off (Turn off the screen saver)

Last Memory
This setting enables you to watch the DVD from the last point it was turn off, (for example changing the source to watch TV)
ON (Activate the lastmemory function)
Off (Deactivate the lastmemory function)

Audio Setup
• Speaker Setup

In the Audio Setup page press the (▼) button to select the Speaker Setup option, then press OK on the remote control to see the Speaker Setup options.

Downmix

- LT/RT A disc recorded multi channel soundtrack, the output signal will be incorporated to left and right channel.

- Stereo   A disc recorded multi channel soundtrack, the output signal will be incorporated to stereo.
Dolby Digital Setup

Dynamic
This option is used to set the compression ratio in order to control the sound (Volume) contrast.

29

Preference Setup

You must press STOP twice to enter the Preference settings.

TV Type

・**PAL**   This is selected when the player is connected to a PAL System TV.

・Multi   The player will set the TV system according to the disc in the tray.

・**NTSC**   This is selected when the player is connected to a NTSC System TV.

Audio
If a language listed below is recorded on the disc, you can play the sound in that language.
If not, the language recorded will be used.

Subtitle
If a language listed below is recorded on the disc, you can set the subtitle to be displayed in that language. If not, the language recorded will be used.

Disc Menu
If a language listed below is recorded on the disc, you can set the Menu to be displayed in that language. If not, the language recorded will be used.

Parental
When playing disc with parental lock function, you may select an Age Contol Grade according to grade of disc and your own preference. For example, if PG is selected, DVD Video disc rated higher than the PG grade cannot be played.

・**KID SAF**	・**PGR**
・**G**	・**R**
・**PG**	・**NC 17**
・**PG 13**	・**ADULT**

Password
The user can change the password that is required when the user wants to change the Age Contol Guade in the Parental Lock function.
Note: Default password is 123456.
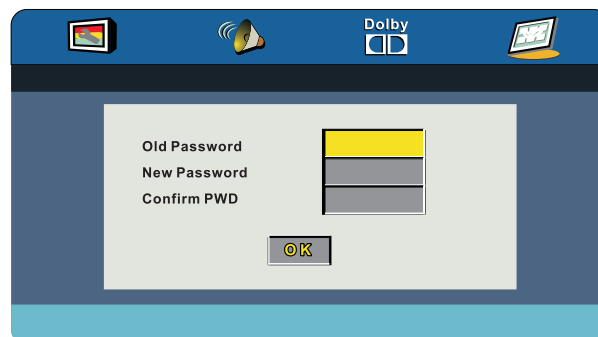

Default
The user can load the original factory setting by choose Reset and press OK button.

Disc Care

About Disc Terms

Title

Generally, pictures or music compressed on a DVD are divided into several sections, "title".

Chapter

The smaller section unit of picture or music in a DVD under the title, usually one title is comprised of one or more chapters and each of them is numbered for easy searching, but some discs may not have a recording chapter.

Track

A segment of picture or music on a CD, each track is numbered for searching.

Care of Disc

Video disc contains high-density compressed data that needs proper handling.

1. Hold the disc with fingers by outer edge and /or the center spindle hole. Do not touch the discs surface.
2. Do not bend or press the disc.
3. Do not expose the disc to direct sunlight or heating sources, stere discs in cabinet vertically, and in dry condition.

Prevent exposure to:

Direct sunlight

Heat or exhaust from a heating device

Extreme humidity

Clean the disc surface with a soft, dry cleaning cloth, wipe the disc surface gently and radically from center toward the outer edge.

Do not apply thinner, alcohol, chemical solvent, or sprays when cleaning. such cleaning fluids will permanently damage the disc surface.

Maintenance

Careful and regular cleaning can prolong the life of your TV.

⚠️ Be sure to Disconnect the mains cable from the mains socket before any cleaning.

1. Use a soft dry cloth to wipe away the dust from the screen and surfaces.

2. If the surfaces are extremely dirty, clean the TV with a cloth which has been dipped in a weak soapy water. Wring the cloth until it is almost dry, then use it to wipe the TV.

3. Ensure there is no excess water on the screen. Allow any water or dampness to evaporate before switching the TV on.

⚠️ Never use alcohol, benzine, paint-thinner, cleaning fluid or other chemicals. Do not use compressed air to remove dust.

Hints and Tips

The following table contains various hints and tips to get the best performance from your TV.

The TV does not operate properly.	
The TV does not respond when pressing any buttons	• The TV may freeze up during use. Disconnect the mains cable from the mains socket for a few minutes. Reconnect the mains cable and try to operate it again as usual.
TV cannot be switched on	• Check that the TV is connected to the mains supply • Make sure all connected AV devices are switched off before switching on your TV.
The remote control does not work	• Check to see if there are any objects between the TV and the remote control causing an obstruction. Ensure that you are pointing the remote control directly at the TV. • Ensure that the batteries are installed with the correct polarity (+ to +, - to -). • Install new batteries.
Power is suddenly turned off	• Check the power of the TV. The mains supply maybe interrupted. • Check if the sleep timer is set. • Check whether the Auto Standby is activated.

The video function does not work.	
No Picture & No Sound	• Check whether the TV is switched on. • Try another channel. The problem may be caused by the broadcaster.
Picture appears slowly after switching on	• This is normal, the image is muted during the TV startup process. Please contact your service centre, if the picture has not appeared after five minutes.
No or poor colour or poor picture	• Adjust the settings in the **PICTURE** menu. • Try another channel. The problem may be caused by the broadcaster. • Check if the video cables are connected properly.
Horizontal / Vertical bar or picture shaking	• Check for local interference such as an electrical appliance or power tool.
Poor reception on some channels	• Station or cable channel may be experiencing problems, tune to another station. • Station signal is weak, reposition the aerial for better reception. • Check for sources of possible interference.
Lines or streaks in pictures	• Check aerial (Change the position of the aerial.)
No pictures when connecting HDMI	• Check if the input source is **HDMI**.
Picture appears in wrong ratio	• Adjust the **Aspect Ratio** settings in the **PICTURE** menu.

32

The audio function does not work.

Picture OK but no sound	• Press the **VOL** + / - buttons. • Sound muted? Press the **Mute** button. • Try another channel. The problem may be caused by the broadcaster.
No output from one of the speakers	• Adjust the **Balance** settings in the **SOUND** menu.
Unusual sound from Inside the TV	• A change in ambient humidity or temperature may result in an unusual noise when the TV is switched on or off and does not indicate a fault with the TV.
No sound when connecting HDMI	• Check if the input source is **HDMI**.
Audio noise	• Keep the RF coaxial cable away from the other connected cables.

Password

Lost Password	• Select the **Change Pin Code** setting in the **FEATURE** menu, then enter the following master password "**8899**". The master password clears your previous password and allows you to enter a new password.

There is a problem in PC mode.

The signal is out of range (Invalid format)	• Adjust the resolution, horizontal frequency, or vertical frequency.
Vertical bar or stripe on background & Horizontal Noise & Incorrect position	• Use Auto configure or adjust clock, phase, or H/V position.
Screen colour is unstable or single colour	• Check the signal cable. • Reinstall the PC video card.

FAQs (Frequently Asked Questions)

Why have I lost some / all of my channels?	• It happens sometimes, if you have a weak signal. Usually it just means you'll need to rescan your digital box or TV. Don't worry, it easy to do. And once you've done it, you should get all the Freeview channels available to you. If problems persist you may need to get your aerial checked. Talk to your retailer or contact your local aerial installer.
Why do I get 'blocking' on my digital picture?	• In most cases, blocking is caused by a reception problem – either the signal is too weak or there is some kind of interference. Talk to your retailer or contact your local aerial installer. • Blocking can also be caused by a digital signal that is too strong. If you are still experiencing blocking and the signal is strong, consult your local aerial installer for advice.
Can I watch Freeview using a portable set-top aerial?	• Some, but only a few, homes may be able to use a set top aerial. However, for a much better reception, we strongly recommend that you use a rooftop aerial. • If you do not have access to a rooftop aerial – for example, if you rent a flat and the aerial is the responsibility of your landlord, or if you're using a second TV in the bedroom and don't want the hassle and expense of using extension cables, a set – top aerial may be your only option.
What type of aerial do I need?	• If you are installing a new aerial, we recommend a wideband rooftop aerial rather than a loft aerial. Loft aerials generally receive a weaker digital signal and are more likely to get interference from other electrical devices in the home. We suggest you have an aerial survey done before getting an aerial upgrade. • Talk to your retailer or contact your local aerial installer.

Contrast Ratio	800 : 1
Power Source	12V === 2A
Energy Efficiency Class	A
Operating Power Consumption	14W
Standby Power Consumption	<0.5W
Operating Temperature	0°C– 40°C
Vesa Wall mounting size / Screw size	75 x 75mm / M4 x 8
Speaker Power	2.5W+2.5W
Dimension (W x D x H)without base	374 x 48 x 244 mm
Dimension (W x D x H) with base	374 x 120 x 274 mm
Weight (Net)	1.7kg

Features and specifications are subject to change without prior notice.

This TV has been tested against the European standards for Energy efficiency using the standard signals and conditions specified in the standard. The result is shown on the energy efficiency label. This is the energy that you would expect the TV to consume under normal working conditions when measured over a period of time. At some times the TV will use more power than this and at some times less. The factors that cause this fluctuation are the actual signals being received, and the Volume setting. Generally speaking the mains voltage, brightness / contrast settings and other settings have a very small effect on energy usage and can to all intense and purposes be ignored. The difference between the power consumed when receiving a high bit rate channel with the volume at max and a low bit rate channel with volume at zero is usually less than 3 watts.

Safety Warnings

- Read all the instructions carefully before using the unit and keep them for future reference.

- Retain the manual. If you pass the unit onto a third party make sure to include this manual.

- Check that the voltage marked on the rating label matches your mains voltage.

Damage
- Please inspect the unit for damage after unpacking.

- Do not continue to operate the unit if you are in any doubt about it working normally, or if it is damaged in any way - switch off, withdraw the mains plug and consult your dealer.

Location of Unit
- The unit must be placed on a flat stable surface and should not be subjected to vibrations.

- Do not place the unit on sloped or unstable surfaces as the unit may fall off or tip over.

- The mains socket must be located near the unit and should be easily accessible.

- This unit is designed for indoor use only.

Temperature
- Avoid extreme degrees of temperature, either hot or cold. Place the unit well away from heat sources such as radiators or gas / electric fires.

- Avoid exposure to direct sunlight and other sources of heat.

Naked Flames
- Never place any type of candle or naked flame on the top of or near the unit.

Moisture
- To reduce the risk of fire, electric shock or product damage, do not expose this unit to rain, moisture, dripping or splashing. No objects filled with liquids, such as vases, should be placed on the unit.

- If you spill any liquid into the unit, it can cause serious damage. Switch it off at the mains immediately. Withdraw the mains plug and consult your dealer.

Ventilation
- To prevent the risk of electric shock or fire hazard due to overheating, ensure that curtains and other materials do not obstruct the ventilation vents.

- Do not install or place this unit in a bookcase, built-in cabinet or in another confined space. Ensure the unit is well ventilated.

- Make sure that there is a gap of at least 10 cm on both sides and a gap of 20 cm at the top.
Safety
- Always disconnect the unit from the mains supply before connecting / disconnecting other devices or moving the unit.

- Unplug the unit from the mains socket during a lightning storm.

Mains Cable
- Make sure the unit or unit stand is not resting on top of the mains cable, as the weight of the unit may damage the mains cable and create a safety hazard.

- If the mains cable is damaged it must be replaced by the manufacturer, its service agent, or similarly qualified persons in order to avoid a hazard.

Interference
- Do not place the unit on or near appliances which may cause electromagnetic interference. If you do, it may adversely affect the operating performance of the unit, and cause a distorted picture or sound.

Optimum viewing
- View the unit in moderate light to prevent eye strain. It is recommended to watch the unit from a distance 3-7 times that of the screen height.

LED screen
- The LED screen is manufactured using high-precision technology. However, some tiny black points and / or bright points (red, blue or green in colour) may constantly appear on the LED screen. These points are generated in the manufacturing process and are normal.

Screen Burn
- A characteristic of Plasma and LED TV Panels is that displaying the same image for a long time may cause a permanent after-image to remain on the screen. This is called screen burn. Most pictures shown on the unit will be constantly moving and fill the screen.

- Examples of images that you need to watch out for are as follows (this is not an all-inclusive list):

  1. **Black Bars:** If black bars appear at the left / right or top / bottom of the screen, it is recommended to change the format so that the picture fills the entire screen.

  2. **TV Channel Logos:** e.g. Shopping channel logos and pricing displays - especially if they are bright and stationary. Moving or low-contrast graphics are less likely to cause ageing of the screen.

  3. **Time Displays**

  4. **Teletext:** Do not view a stationary page for long periods of time.

  5. **TV Menus**

  6. **Pause Mode:** Do not leave the screen in pause mode for long periods of time, e.g. when watching videos.

- To prevent screen burn if viewing any of the above for long periods of time, reduce contrast and brightness when viewing. Once burn-in occurs it will never disappear completely.

Headphones

- Listening to loud sounds for prolonged periods of time may permanently damage your hearing.

- Before putting on headphones, turn the volume down then put the headphones on and slowly increase the volume until you reach a comfortable listening level.

Standby

- The ⏻ button on the remote control does not switch off the unit completely. The unit will continue to draw electricity from the mains supply while in standby. In the interests of safety and to avoid unnecessary energy consumption, never leave the unit in standby while unattended for long periods of time, e.g. overnight, while on holiday or while out of the house. Switch it off and disconnect the mains plug from the mains socket.

Batteries

- Batteries used in the remote control for this unit are easily swallowed by young children and this is dangerous.

- Keep loose batteries away from young children and make sure that the battery holder tray is secure in the remote control. Seek medical advice if you believe a cell has been swallowed.

- Please dispose of batteries correctly by following the guidance in this manual.

Supervision

- Children should be supervised to ensure that they do not play with the unit and the remote control.

- Never let anyone especially children push anything into the holes, slots or any other openings in the case - this could result in a fatal electric shock.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the unit's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the manual accompanying the unit.

Service

- To reduce the risk of electric shock, do not remove screws. The unit does not contain any user-serviceable parts. Please leave all maintenance work to qualified personnel.

- Do not open any fixed covers as this may expose dangerous voltages.

Maintenance

- Ensure to unplug the unit from the mains socket before cleaning.

- Do not use any type of abrasive pad or abrasive cleaning solutions as these may damage the unit's surface.

- Do not use liquids to clean the unit.

Important Note

This TV is fitted with the latest ECO friendly power saving technology. If whilst viewing the TV remote control is not used for a period of 4 hours, the Auto Standby feature will operate and power down the TV. A warning message will be displayed to inform you that the TV is about to power down.

Packaging materials are not toys. Please keep away from children. Plastic bags can cause suffocation when pulled over the head.

Waste Electrical Recycling

Correct disposal of Product

This sign indicates that this product may not be disposed of with your regular household waste. The recycling and separate collection of such products is your responsibility. Please drop off the above mentioned waste at a designated place for recycling waste electrical and electronic equipment. If you do not know where to drop off your waste equipment for recycling, please contact your local city office or household waste collection service.

The crossed out wheeled dust bin symbol indicates that batteries and /or accumulators must be collected and disposed of separately from household waste.

If the battery or accumulator contains more than the specified values of lead (Pb), mercury (Hg), and/or cadmium (Cd) defined in the Battery Directive (2006/66/EC), then the chemicals symbols for lead(Pb), mercury (Hg) and/or cadmium (Cd) will appear below the crossed out wheeled dust bin symbol.

By participating in separate collection of batteries, you will help to assure the proper disposal of products and batteries thus help to prevent potential negative consequences for the environment and human health.

For more detailed information about the collection and recycling programmes available in your country, please contact your local city office or the shop where you purchased this product.

This appliance complies with European Safety and Electrical directives.

It fullfils the following EU regulations:

EN 55022:2006+A1:2007
EN 55013:2001+A1:2003+A2:2006
EN 61000-3-2:2006+A1:2009+A2:2009
EN 61000-3-3:2008
EN 55024:1998+A1:2001+A2:2003
EN 55020:2007
